

Go Outside

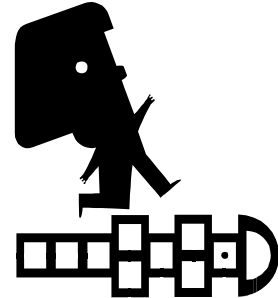

Hop Scotch

What you need:

1 Piece of Chalk

1 Small rock

Sideway or driveway

How To Play

First you need to draw the layout. This should be 3 single squares, 1 double square, 2 single squares, 1 double square and 1 single square.

Number the squares in order from 1 – 10. Throw the rock into the first square. Hopping only on one foot, jump over the square with a rock to land in the second square. Only one foot in each square at a time. Land in the double squares with one foot in each at the same time. The tricky part is landing only in one of the squares when the rock is in one of the double squares. On the second turn, throw the rock into the second square, and so forth.
