

Go Outside

I Spy

What you need:

An observable area outside

How To Play

“IT” finds an item outside and chooses it but doesn’t tell the others. To start, they say “I spy with my little eye something...(a detail about the object such as color, feel, shape etc) If the other kids can’t guess what it is, IT keeps giving them clues until someone guesses correctly. They get to be “IT” next.
