

# Go Outside

## Hole in the Bucket

### **What you need:**

2 large cans (coffee or bean)  
1 large plastic garbage can  
2 buckets  
Hammer and Nails

### **How To Play**

First take the cans and make holes in them using the hammer and nails. Make around 5 holes in each can. Fill the garbage can with water. Split in to two groups and place the buckets about 40 feet from the starting line. Each team will have one player at a time go and they start by filling their can (which is full of holes) with water. They must hold the can over their head while they run toward their bucket 40 feet away and empty into it what is left of the water. The next kid goes when they return with the can. The first team to fill up the bucket with water wins!
