

Go Outside

Poison Pool Toss

What you need:

Pool toys
1 long rope or net

How To Play

Great pool game for large gatherings. Divide the pool in half using a rope or net with players evenly distributed on both sides. If there is a deep end, make sure that players on that side are good swimmers. Have two baskets full of pool toys like noodles, vinyl balls and other soft-sided balls. With the same number of toys in each basket, dump them in the water on each side of the line. On go, all players will try to throw the items to the other side of the line and try to keep their side of the pool free of items. You can play for 5 – 10 minute games. When the whistle blows you must stop immediately. The team with the least amount of items is the winner.
